

Your Homework

Using the Cognitive Stages Observation Form and Checklist in this Chapter, choose at least two target children to identify the following in your room:

- What Stage of Play are your target children operating at?
- What are some Functional Types of play you can see these children engaging in? What is the value of this play for their skill/knowledge development?
- What cognitive developmental stage are these children operating at?
- What Urges can you observe in your children's play?

Consider:

- What might you introduce in your room in terms of some resources that would excite these children to explore further?
